**THE FINEST  
COMFORT SHOES**

CATALOG 2025/26

## DEAR CUSTOMERS,

as a manufacturer of shoes made in Germany, our focus is on quality, comfort and sustainability. Each pair is made with great care and craftsmanship - some of them sewn by hand!

We are delighted to be able to offer you durable, comfortable shoes that support healthy walking. Investing in well-made, healthy shoes has paid off many times over - it is good for your musculoskeletal system, your wallet in the long term and, last but not least, the environment.

Even if we can see which shoes are particularly popular with you based on the number of units delivered, we look forward to direct feedback: your opinion is what drives us! Criticism and suggestions are essential for us to continuously develop our products and not only meet your expectations, but exceed them.

Ralph Wolter  
Managing Director and Co-Owner FinnComfort®

# BEST CONDITIONS – STEP BY STEP.

## IT IS ALL A QUESTION OF ATTITUDE

Physical well-being depends heavily on the position of the feet. This not only influences posture and gait, but also the entire body. Each foot type presents a completely different challenge for the development and manufacture of a shoe. The core of our work at FinnComfort is to respond to the uniqueness of feet and to develop feel-good shoes with an optimum fit. Your needs always come first! That is why we are constantly developing our shoe collections.

## DURABILITY AND COMFORT

- Comfortable to wear thanks to padded shaft end
- Comfortable walking thanks to the anatomically shaped footbed
- Breathable thanks to lining made from the finest leather
- Freedom of movement for the toes thanks to the foot-friendly, natural fit and elastic toe cap
- Step guidance through stable rear cap
- Impact cushioning thanks to concave recess in the heel area and cushioning material on the outsoles
- Ventilation through integrated air channels in all closed hand-sewn models

## FinnSlim

### EXTRA SLIM FIT

Optimum comfort for petite feet: the FinnSlim cut of the shoe and footbed offers optimum fit and support for anyone who walks on a narrow foot. With these models, you are not only comfortable, but also always safe on the move.

## FinnPlus

### EXTRA WIDE FIT

Pleasantly spacious for strong feet: the Finn-Plus cut was developed to guarantee a high level of walking comfort despite the larger free space. The shape of the shoe and the footbed ensure perfect support and a secure step.

## FinnStretch

### ROOM FOR SENSITIVE FEET

Room for orthopaedic requirements: The FinnStretch models offer perfect foot guidance for rheumatics and diabetics. Sufficient space for the toes, width in the forefoot and secure heel support make them comfortable to stand and walk in. Ideal for hallux valgus, hallux rigidus, deformed toes and swelling feet.

### FinnStretch-Fit

- Stretch inserts
- Shock-absorbing outsoles
- Cushioned footbed
- Soft leather

## FinnMellow

### FOOTBED FOR A SUPER-SOFT STEP

Dynamic cushioning and excellent pressure distribution: the innovative FinnMellow technology promises ultimate comfort. The soft footbed is modeled on the anatomy of the foot. This allows the body load to be distributed evenly over the entire sole of the foot.

The cushioned tread relieves pressure on the joints and prevents or alleviates pain in the feet and joints. The vegetable-tanned cover leather also ensures a pleasant foot climate.

#### FinnMellow-Sole

- Particularly flexible and resilient
- High restoring forces
- Shock absorbing function
- Cushioning padding material
- Stabilized cork heel cup

If required, the foot bed can be replaced with an individual orthopaedic insole.

## Finnamic

### HEEL ROLL FOR COMFORTABLE WALKING

Take the strain off your feet and strengthen them at the same time: It's possible! With the Finnamic technology from FinnComfort®. It supports our feet - the most stressed parts of the body - thanks to the specially developed shape of the outsole. Floors that are hostile to the feet, body weight and constant balancing of the body's center of gravity? No longer a problem with the Finnamic models.

Rockered soles for gentle and cushioned walking

Wide and flat mid-section for secure and relaxed standing

Rockered forefoot section encourages

- |               |   |                                |                    |

# FINNCO: SPORTY STYLISH YOUNG

## CHIC ON THE OUTSIDE. FIT ON THE INSIDE.

All show and no substance? Many sneakers and open shoes have been manufactured according to this principle up to now. This is now a thing of the past, because Finnco now brings style and foot health together.

What do we do differently? We only use genuine leather and high-quality, breathable materials instead of cheap plastics and leather. Plus a last shape and a footbed developed by orthopaedists.

„Beauty knows no pain.“ Sorry, with Finnco you can safely delete this sentence from your repertoire!

# THE FEEL-GOOD SHOE

## VERY CLOSE TO "TAILOR-MADE"

Your feet are as individual as your fingerprint. From your anatomy to the way you move. That's why we at Finn Comfort® are convinced that one last is not enough for all models. Our philosophy is based on numerous model lines with different characteristics. So that your feet find the home that makes you say "Everything fits here!".

We are happy to accept the significantly greater effort involved in production. Because of the comfort that our customers describe as unique. But also because a pair of high-quality "favorite shoes" is more sustainable than a whole range of shoes in the closet that are thrown away after a short time because they are "uncomfortable".

## ONE SHOE. MANY POSSIBILITIES!

Turn your shoes into a wellness center for your feet. You determine the pampering program. How do you do that? With the interchangeable footbeds of our Finn Comfort shoes. Whether super-comfortable footbed, reflexology footbed or orthopaedic insoles: you can change the footbed in one easy step - and at the same time enjoy a new sensory experience for your feet. Which, by the way, you will enjoy for a very long time: Not only the footbed can be reordered. As many elements of our shoes are made by hand, we offer a comprehensive repair service.

# PREVENTION & THERAPY

## **MISSION NORMALITY.**

Whether for prophylaxis or for the comeback from an accident, illness or injury: our FinnHealth models accompany you on the way to your goal.

We have brought together doctors and shoemakers to develop solutions that relieve and support your feet. Our designers were also involved in this process right from the start with a special commission. Their task: to make special shoes with their many beneficial special functions still look like normal models. Mission accomplished!

### FINNHEALTH PREVENTION

Sensitive pressure points are uncomfortable and hinder walking and standing. FinnComfort® has therefore developed the prophylaxis shoe after intensive research and in collaboration with doctors and orthopaedic technicians.

These special FinnComfort® models are made of soft leather. In addition, our prophylaxis shoes have no pinching seams and

have more width and additional padding on the shaft and in the forefoot. Extended rear caps on both sides provide optimum guidance for your feet and ensure a natural rolling movement.

The cushioned and reinforced tongue takes the load off the instep area

Generous forefoot space for maximum wearing comfort

High toe box, soft toe cap

The fully cushioned forefoot protects against pressure points

Fully lined interior

The two-sided extended heel counter ensures optimal support

Reinforced padding in the knuckle area protects against friction

Outstanding flexibility

A footbed with soft cushioning allows you to walk on clouds

### FINNHEALTH THERAPY - FINNSTABIL

Functional aftercare for a faster recovery. Therapeutic shoes can play an important role in the functional follow-up treatment of ligament injuries in the upper ankle. Despite the limited mobility of the injured foot, the goal is to mobilize it as early as possible. This will hopefully reduce the length of a hospital stay and reduce time away from work. For versatile orthopedic care, developed with specialists.

The benefit: Reduction of rehabilitation time and improvement of treatment results.

In recent years, the method of treatment for ankle injuries has evolved. This includes using therapeutic shoes which provide an alternative to traditional plaster casts. Injuries such as capsule and ligament tears, Achilles tendon damage, strains, or fractures of the metatarsal bones, are becoming more common. Special therapeutic shoes can also provide immediate care for various states of paralysis, such as those after a stroke or a peroneus paralysis. Such footwear can be used instead of, or in addition to, paralysis orthosis or bandages.

Functional treatment with therapeutic shoes can help enable load bearing, controlled and stabilized movement and, therefore, support faster recovery. Of course, the use of therapeutic shoes should always be in consultation with the doctor treating the injury or a specialist orthopedic company.

Therapeutic footwear can also be used in the conservative treatment of fresh Capsular ligament injuries or neurological diseases. This can include spastic paralysis after a stroke or during infantile cerebral palsy (Little's disease).

After therapy has been completed, The Stable shoe from FinnComfort can be worn as a street shoe. All that is required is to remove the two stabilizers from the inside and outside.

Foam cushion reduces the risk of pressure sores, Top of Tongue and Shaft

Antibacterial mesh lining

Calfskin tongue and quarter lining

Individual width adjustment

Fleece heel reinforcement

Customizable, thermoplastic Heel Cap

Customizable, Thermoplastic Toe Cap

Stabilization elements 2 inside/outside

Fleece Insole

PU outsole with air chambers. Ball and heel cushioning. Heel with concave shock absorber.

### OTHER POSSIBLE USES:

- + Helps when walking is impaired from severe damage to the ankle ligaments, or as part of postoperative treatment. Immediate care for spastic paralysis after a cerebral injury and/or in infantile cerebral palsy
- + Certain bony injuries of the ankle and the foot e.g., malleolar fracture, stress fracture
- + Endoprostheses (particularly in the front and rear ankle area)
- + Ankle sprains
- + Ankle osteoarthritis
- + Instabilities, e.g., partial stiffening, wobbly stiffness
- + Therapy after Achilles tendon rupture, or after other operations in the Achilles tendon area, e.g., Achilles tendon lengthening
- + Immobilization in the tarsal and metatarsal area
- + Joint protection in the forefoot area
- + Post-stroke condition
- + Flaccid paralysis (paresis, paralysis)
- + Spastic paralysis
- + Weak ligaments (prophylaxis against sprains)

### FINNORTHO

Soft therapy:

- 1 Anatomically designed, softly cushioned vamp to protect toes and forefoot from pressure points
- 2 Seamless textile lining in the forefoot is antiseptic, breathable and easy-to-clean
- 3 Wide opening allows more room for easy foot entry
- 4 Cushioned collar and tongue for extreme comfort prevents the danger of pressure sores
- 5 Extended heel counters guarantee stability and heel motion guidance
- 6 Raised rear topline reduces heel slippage, even with thicker insoles
- 7 Shock absorbing rocker sole encourages a softer heel strike and smooth natural gait
- 8 Wide and level surface for a secure and relaxed stand
- 9 Midsole/Optional reinforced rigid midsole also available
- 10 Rocker tip promotes the natural forwardrolling action

### FINNORTHO

189 million people worldwide live with diabetes. When the disease is diagnosed too late or poorly controlled, it may lead to the possibility of developing Diabetic Foot Syndrome. Vascular and neurological abnormalities frequently damage the foot.

Neuropathy, decreased blood circulation through arteries of the lower extremities, wounds that do not heal and even amputation of the foot are not uncommon in a diabetic. Well fitted and high quality extra-depth therapeutic walking shoes can help counteract this syndrome before foot ulcers occur or an amputation becomes imminent.

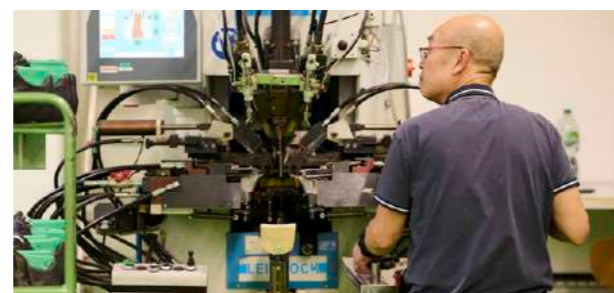

If you suffer from repeated foot sores or have wounds increasingly difficult to heal, then FinnOrtho by FinnComfort® might be the perfect shoe for you.

**Made in Lower Franconia.** Quality comfort shoes from FinnComfort® are manufactured in our factory in Haßfurt, an idyllic small town in Lower Franconia, near Bamberg.

Despite the enormous market pressure from low-wage countries, we have managed to hold on to our home location for 75 years: Here we can reliably meet the high quality standards we set for the care we take in our production. We are clearly committed to our responsibility as an employer in the region.

We secure and create jobs in Germany, we are committed to our region and we will continue to produce in Germany in the future. This is the only way we can guarantee that we actually produce shoes that we feel comfortable in.

## SUSTAINABLE ON THE MOVE

FinnComfort® only uses high-quality upper leathers from ecologically and quality-conscious, predominantly German and European tanners who guarantee water protection, the responsible use of chemicals and social aspects. The breathable and skin-friendly upper leathers are guaranteed to be free from harmful preservatives (PCP) and AZO dyes as well as allergy-causing nickel compounds.

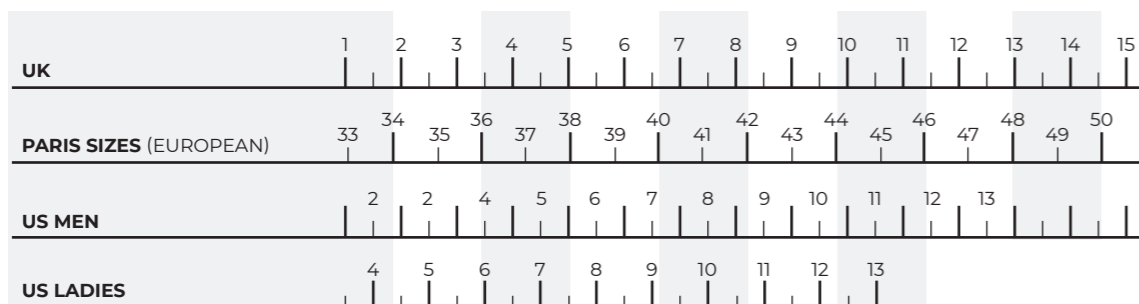

Renewable raw materials such as cork, jute and natural latex are the main components of the insoles, which, together with vegetable-tanned leathers, ensure excellent breathability and an optimal foot climate. The use of chemical additives is avoided wherever possible. Shafts and soles are predominantly bonded with water-soluble adhesives. All soles are foamed CFC-free. In this way, we en-

sure a good wearing comfort and a positive (foot) climate.

FinnComfort® has firmly anchored active environmental protection and sustainable further development of the company in its corporate principles. In view of the growing demand, the first thing to do is to use limited natural resources sparingly. We strive to reduce transportation and use the latest technologies in our factory to increase our energy efficiency. Sustainable progress does not happen on its own, but only through close involvement of our employees and intensive cooperation with our partners.
